
FOLIA MICROBIOLOGICA

International Journal for Basic, Environmental and Applied Microbiology,
and Immunology

The journal is published by the *Institute of Microbiology, v.v.i.,
Academy of Sciences of the Czech Republic*
(Director of the Institute: MARTIN BILEJ, DSc.) and
Czechoslovak Society for Microbiology
(Chairman of the Society: Prof. IVAN ČIŽNÁR, DSc.)

Editor-in-Chief

JIŘÍ MATĚJŮ, PhD.

Assistant Editors

JOSEF CUDLÍN, PhD.

KAREL SIGLER, DSc.

ČENĚK NOVOTNÝ, PhD.

Technical Editor

ZUZANA HAVELKOVÁ, MSc.

The international journal *Folia Microbiologica* is published by the *Institute of Microbiology* and the *Czechoslovak Society for Microbiology*. It covers virtually all branches of microbiology (general, soil, medical, industrial) plus some branches of immunology. The number of published manuscripts in 2007–2009 was 252. The journal experiences an ever-increasing influx of authors from all over the world. The 21-member Editorial Board includes scientists from the *Institute of Microbiology* and from other science establishments and universities in the Czech Republic, Slovakia, Germany, Switzerland and the USA. In 2009 the Editorial Board was extended by new scientists to meet the demands for larger coverage of various fields. The journal has been placed on the data bases of major important publishing houses and societies, e.g., *AGRICOLA*, *Biological Abstracts*, *Chemical Abstracts*, *Current Contents*, *Excerpta Medica* (EMBASE), *MEDLINE*, *Research Alert*, *Veterinary Bulletin*, etc. In 2008 the journal joined the Springer family of journals. The free-of-charge access to full texts provided by Springer in 2007–2008 resulted in an unprecedented increase in impact factor.
