Introduction. B. Bendlová

xi

Reviews

The origin of 7 α -hydroxy-dehydroepiandrosterone and its physiological role: a history of discoveries. L. Stárka
(*Inst. Endocrinol., Prague, Czech Republic*) **S285**

Peripheral sensitivity to steroids revisited. R. Hampl, K. Vondra (*Inst. Endocrinol., Prague, Czech Republic*) **S295**

Prenatal exposure to bisphenols and parabens and impacts on human physiology. L. Kolatorova, M. Duskova,
J. Vitku, L. Starka (*Dept. Steroids and Proteofactors, Inst. Endocrinol., Prague, Czech Republic*) **S305**

The role of stress hormones in dental management behavior problems. M. Dušková, J. Vašáková, J. Dušková,
J. Kaiferová, Z. Broukal, L. Stárka (*Inst. Endocrinol., Prague, Czech Republic*) **S317**

The influence of smoking and cessation on the human reproductive hormonal balance. H. Jandíková, M. Dušková,
L. Stárka (*Third Dept. Med. – Dept. Endocrinol. Metabol., First Fac. Med., Charles Univ., General Univ. Hosp.
Prague, Prague, Czech Republic, Inst. Endocrinol., Prague, Czech Republic*) **S323**

Vitamin D, neurosteroids and autism. L. Máčová, M. Bičíková, D. Ostatníková, M. Hill, L. Stárka (*Inst. Endocrinol.,
Prague, Czech Republic*) **S333**

New molecules modulating bone metabolism – new perspectives in the treatment of osteoporosis. I. Zofkova,
J. Blahos (*Inst. Endocrinol., Prague, Czech Republic, Osteocentrum, Ctr. Military Hosp., Prague, Czech Republic*) **S341**

Specific metabolic characteristics of women with former gestational diabetes: the importance of adipose tissue.
D. Vejrazkova, M. Vankova, P. Lukasova, J. Vcelak, V. Cirmanova, M. Haluzik, B. Bendlova (*Inst. Endocrinol.,
Prague, Czech Republic*) **S349**

ZBTB16 and metabolic syndrome: a network perspective. O. Šeda, L. Šedová, J. Včelák, M. Vaňková, F. Liška,
B. Bendlová (*Inst. Biol. Med. Genet., First Fac. Med., Charles Univ., Prague, Czech Republic, Dept. Molecular
Endocrinol., Inst. Endocrinol., Prague, Czech Republic*) **S357**

Original Articles

Sex differences in the effect of prenatal testosterone exposure on steroid hormone production in adult rats.
E. Domonkos, V. Borbélyová, L. Kolátorová, T. Chlupáčová, D. Ostatníková, J. Hodosy, L. Stárka, P. Celec (*Inst.
Molecular Biomed., Fac. Med., Comenius Univ., Bratislava, Slovakia*) **S367**

Changes to fetal steroidogenesis caused by maternal smoking. K. Adamcová, L. Kolátorová, T. Chlupáčová,
M. Šimková, H. Jandíková, A. Pařízek, L. Stárka, M. Dušková (*Dept. Obstet. Gynecol., First Fac. Med., General
Teaching Hosp., Prague, Czech Republic, Inst. Endocrinol., Prague, Czech Republic*) **S375**

**Can the gold standard be beaten? How reliable are various modifications of the Synacthen test compared to the
insulin tolerance test.** M. Kosak, M. Duskova, L. Starka, H. Jandikova, H. Pospisilova, M. Sramkova, V. Hana,
M. Krsek, D. Springer, K. Simunkova (*Third Dept. Med., Dept. Endocrinol. Metabol., First Fac. Med., Charles Univ.
General Univ. Hosp. Prague, Czech Republic, Inst. Endocrinol., Prague, Czech Republic*) **S387**

Radioimmunoassay of chromogranin A and free metanephrines in diagnosis of pheochromocytoma. R. Bílek, T. Zelinka, P. Vlček, J. Dušková, D. Michalský, K. Novák, E. Václavíková, J. Widimský Jr. (*Inst. Endocrinol., Prague, Czech Republic*) **S397**

Vitamin D supplementation changed relationships, not levels of metabolic-hormonal parameters in autoimmune thyroiditis. K. Vondra, R. Bílek, P. Matucha, M. Salátová, M. Vosátková, L. Stárka, R. Hampl (*Inst. Endocrinol., Prague, Czech Republic*) **S409**

Hormonal and bone parameters in pubertal girls. V. Cirmanova, I. Zofkova, P. Kasalicky, V. Lanska, M. Bayer, L. Starka, R. Kanceva (*Inst. Endocrinol., Prague, Czech Republic*) **S419**

ZBTB16 gene variability influences obesity-related parameters and serum lipid levels in Czech adults. B. Bendlová, M. Vaňková, M. Hill, G. Vacínová, P. Lukášová, D. Vejražková, L. Šedová, O. Šeda, J. Včelák (*Dept. Molecul. Endocrinol., Inst. Endocrinol., Prague, Czech Republic*) **S425**

Patients with IgA nephropathy have altered levels of immunomodulatory C19 steroids. Glucocorticoid therapy with addition of adrenal androgens may be the choice. I. Šterzl, M. Hill, L. Stárka, M. Velíková, R. Kančeva, J. Jemelková, L. Czerneková, P. Kosztyu, J. Zadražil, K. Matoušovic, K. Vondrák, M. Raška (*Inst. Endocrinol., Prague, Czech Republic*) **S433**
