

Guest Editor Introductory Words

Anniversary of the 100th Joint Meeting of the Czech and Slovak Physiological Societies was held in Prague on February 4-5, 2025. It was hosted by the First Faculty of Medicine of Charles University and brought together numerous Czech and Slovak physiologists, pathophysiologists, pharmacologists, and representatives of related disciplines. All presentations – both lectures and posters – met high scientific standards and sparked stimulating discussions, not only in the lecture halls of the Albertov campus but also during informal conversations in the breaks and at the social event.

Some of the works presented at the meeting have been submitted to this Supplement of Physiological Research. I would like to express my sincere thanks to all

contributing authors and, above all, to the reviewers whose evaluations helped improve the submitted manuscripts.

You may notice that the papers collected in this Supplement come from one region of the Czech Republic – Ostrava and its surroundings. In this sense, this issue can be seen as an invitation to the next meeting of the Czech and Slovak Physiological Societies, which will take place in Ostrava on February 3-5, 2026.
