

Supplementary Table 3. Summary of comparisons between contralateral and reference regions.

<i>Tissue type</i>	Sequences included	p-value range	Overall result
<i>GM+WM</i>	T1w, T2w, FLAIR, qT1	0.48-0.88	No significant differences across sequences
<i>WM</i>	T1w, T2w, FLAIR, qT1	0.41-0.85	No significant differences across sequences
<i>GM</i>	T1w, T2w, FLAIR, qT1	0.48-0.98	No significant differences across sequences

GM – grey matter, WM – white matter.
